Absence costs money

According to laws and regulations, employers are responsible for providing a safe working environment. Eye injuries can lead to absence from work and high costs per day. Good prescription safety glasses reduce risks in the workplace and help prevent absence.

It All Starts With the Right Frame

Safety and comfort are seamlessly combined in the frames for our prescription safety glasses. All of our new frames carry a CE marking and comply with the newest ISO 16321 standards. Their excellent fit also ensures a high level of comfort, which leads to strong user acceptance.

Our collection consists of 10 stylish plastic frames and 6 classic metal frames. This gives your employees complete freedom to choose a model that perfectly matches both their personal style and their work activities.

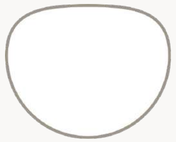

All frames are included in the price.

Choose From Three Types of Lenses

Prescription safety glasses should not only provide the best possible protection, but also offer a high level of wearing comfort. That is why choosing the right type of lenses is essential. The lenses for our prescription safety glasses are available in three versions: single-vision, multifocal, and optimized multifocal.

Single-vision

Single-vision lenses provide correction for either near or distance vision. This is sufficient for those who do not need a reading segment.

- Lenses with a single prescription
- Correction for near or distance vision
- Most used by people up to the age of 40

Multifocal

Multifocal lenses provide correction for both near and distance vision. They are necessary for those who need a reading segment.

- Lenses with multiple prescriptions
- Correction for near and distance vision
- Often necessary from the age of 40 and up

Multifocal Optimal

Our Multifocal Optimal lenses offer maximized fields of vision and reading areas, with minimal distortion and improved stability.

- The best multifocal lenses
- Wider field of vision and more comfort
- Natural and stable vision without distortion

Discover the Power of Coatings

During many work activities, harmful substances and materials can be released without being noticed. Therefore, it is essential to protect your employees' eyes as effectively as possible.

Our prescription safety glasses are equipped with various high-quality coatings that provide extra protection and comfort. Below you will find an overview of the available coatings and their corresponding benefits.

Scratch-resistant

Prevents scratches on your lenses

Anti-reflective

Prevents distracting reflections

Water-repellent

Ensures that water easily beads up and runs off the lenses

Anti-fog

Prevents fog and steam from impairing visibility

Super coat

This is an additional coating that reinforces the other coatings and also makes the lenses up to 70 times stronger.

Add the Right Coatings

The price of prescription safety glasses also depends on the coatings you choose. The coatings need to be tailored to your specific work activities and the associated risks. We offer our coatings in three product lines: **Black Line, Top Line, and Superior Line**. Below you will find an overview of the key differences between these three lines.

Black Line

Offers exactly what is needed for safe working and is known for its scratch-resistant performance. A reliable choice.

Black Line coatings

- ✓ Scratch-resistant
- × Water-repellent
- × Anti-reflective
- × Anti-fog
- × Super coat

Top Line

The same as the Black Line, but with improved water-repellent and anti-reflective coatings. Very comfortable vision.

Top Line coatings

- ✓ Scratch-resistant
- ✓ Water-repellent
- ✓ Anti-reflective
- × Anti-fog
- × Super coat

Superior Line

Most popular

Thanks to the super coat, our Superior Line offers up to 70 times more protection. The best choice for a worry-free workday.

Superior Line coatings

- ✓ Extra scratch-resistant
- ✓ Extra water-repellent
- ✓ Extra anti-reflective
- ✓ Anti-fog
- ✓ Super coat

Prices for Prescription Safety Glasses

The final price of prescription safety glasses is determined by the selected lens type (non-prescription, single-vision, multifocal, or multifocal optimal) in combination with the chosen coatings. Below you will find an overview of all possible combinations. The prices shown apply to a complete pair of glasses, including the frame.

	Price excl. VAT	**€ 295.00**	Price excl. VAT	**€ 305.00**	Price excl. VAT	**€ 330.00**
Multifocal Optimal For distance and near vision Best vision and highest comfort	**Black Line**		**Top Line**		**Superior Line**		
	Price excl. VAT	**€ 322.50**	Price excl. VAT	**€ 332.50**	Price excl. VAT	**€ 357.50**

Extra Options and Accessories

With every pair of prescription safety glasses, we provide a free case, a cleaning cloth, and a cord. In addition, you can choose optional extras such as tinted lenses and photochromic (self-tinting) lenses.

Options/accessories	Frequency	Price excl. VAT
Case	With every pair of glasses	Free
Cleaning cloth	With every pair of glasses	Free
Cord	With every pair of glasses	Free
Tinted lenses	Optional for all glasses	€ 21.66
Self-tinting lenses	Optional for all glasses	€ 88.50

Our prescription safety glasses are designed to last and help prevent waste. We reduce waste and energy consumption and use recyclable materials wherever possible. For example, all accessories are made from 100% recycled PET bottles.

RECYCLED PET

Discover Our Full Face Mask Glasses

In addition to prescription safety glasses, we also offer prescription mask inserts (glasses for use inside full-face masks).

Using a full-face mask in combination with regular glasses often causes problems, such as leakage, reduced wearing comfort and an unreliable fit. This requires a solution that is technically correct and specifically tailored to both the user and the mask.

We have extensive experience with these types of custom solutions and can supply various configurations, depending on the mask, the application and the working environment. We provide targeted advice and ensure a suitable technical solution.
